

MEETING MINUTES

DATE: <2025-10-03> @ <11:00 EST> | LEAD: NATHAN | SCRIBE: FARES

ATTENDEE (ROLE)

- Nathan
- Anish
- Fares

TASK DONE : RESPONSIBLE : PROOF

- Looked at Taler repo, including these relevant files
 - Marc walks us through OIMcurrency.swift – shows data structure used in iOS
 - Ivan walks us through PeerManager.kt – the main class PeerManager handles the state of push pull, incoming outgoing
 - We learned that all the connection with WalletCore is already implemented, so you do not need to care about how to communicate with WalletCore
- Walked through the UML diagram
 - Adding scopes to our UML diagram (and were told a wallet can have multiple scopes)

ISSUE : PROPOSED SOLUTION(S)

- Taler does not do currency conversion

TASK TO DO : RESPONSIBLE(S) : DEADLINE

- Need to determine animation system for representing bills in our Android implementation

DECISIONS

- <DECISIONS>

NEXT MEETING(S)

- <2025-10-05> @ <02:00 EST>
 - Agree on coding standards
 - Look at internal documentations
 - Finalize UML diagram
