MEETING MINUTES

DATE: **2025-09-23 @ 11:00 AM EDT** | **LEAD:** **NATHAN** | **SCRIBE:** **AMISH**

ATTENDEE (ROLE)

- Nathan (Lead)
- Amish (Scribe)
- Anish
- Fares
- Zaki
- Brett (Partner, Founder - MyOralVillage / OIM)
- Ivan (Partner, Android Developer)
- Marc (Partner, iOS Developer - Taler Systems)
- David (Partner, Director of Partnerships - MyOralVillage)

TASK DONE : RESPONSIBLE : PROOF

- 📕 User Stories - Orali Money.pdf were reviewed : Everyone : On Email

BRETT'S NOTES ON USER STORIES

- 1. "literate person sending and requesting. Yes."
- 2. "Professional with dyscalculia. Not yet. This is an aspiration, especially for Europe. We will work on it in summer 2026."
- 3. "Bank of Sierra Leone. Outside our current scope, beyond what Taler is already doing."
- 4. "User warnings. Out of current scope. Probably early next year."
- 5. "Icons to avoid confusion. Great."
- 6. "Easy to withdraw money from the bank. Out of current scope."
- 7. "Clear receiving of money. Yes."
- 8. "Authentication. Irrelevant per Taler."
- 9. "Onboarding. Also aspirational. Of all new areas, this is perhaps the most interesting if there is extra time. We have ideas and can discuss them with you."
- "Just to finish up, I would add one use case that is missing. Shareability. This is really the first step in developing a community-based payment system. A literate person should be able to EASILY share this app with an illiterate loved one and that person would know how to use it a week later, the next time they pick it up."

ISSUES / RISKS : PROPOSED SOLUTION(S)

- Version Control & Collaboration:
    - Issue: Sharing code/assets across iOS and Android.
    - Proposed Solutions: Central repo between Ivan and our team for assets.
- Use more native/system frameworks for optimization.

- User Understanding:
  - Issue: Designing for low-literacy, low-numeracy users is challenging.
  - Proposed Solution: Prioritize intuitive visuals and user testing.

TASK TO DO : RESPONSIBLES(S) : DEADLINE

- User Stories : Team (Send via email for partner approval and feedback).
- Repo Sharing: Share our GitHub repo with Ivan.

DECISIONS

- Scope: Team will focus only on UI; backend integration out of scope (Taler Systems has the backend + database).
- Authentication: Use built-in device security (Face ID, PIN, etc.), no custom auth required.
- Meetings: Weekly with Ivan and Marc (for next few weeks); Ivan prefers Mattermost - Invitation already sent on Outlook
- Reporting Structure:
  - Android: Report to Ivan.
  - Design-specific: Report to Marc & Brett.
  - Keep all partners in CC.

NEXT MEETING(S)

- **2025-09-25 @ 8:00 PM EDT**
  - 🌔 Walk through the OIM demo (by or before Thursday).
  - 🌔 D1 Rough Draft / Finalization.
  - 🌔 Sign Up on Mattermost (https://mattermost.taler.net/signup_user_complete/?id=bb6z84jsp3ngmcfyr6x5mpqkfo&md=link&sbr=su)
  - 🌔 CAD Currency Images (Bank of Canada)
